

Holiday Shores Sanitary District

Cross Connection Control Survey

Holiday Shores Sanitary District is required by the Illinois Environmental Protection Agency (IEPA) to have a cross-connection control program in place to protect the public water supply from contamination. The IEPA also requires us to follow an approved **Cross-Connection Control Ordinance and to perform a Cross-Connection Control Survey** for all of our water customers. The purpose of the survey is to identify certain plumbing fixtures or special uses of the water supply in your home or business.

Thank you for helping us to complete the survey and comply with these important IEPA requirements. If you have any questions, please call 618.656.4933.

Customer: _____

Address: Street: _____ City: _____ Zip Code: _____

* Are there any backflow prevention devices installed on the premises? This does not include devices installed on the city water meter or outside water/garden hose.:

☐ Yes

☐ No

* Do you have a permanent in-ground lawn irrigation system installed on your property? This does not include lawn watering devices attached to a garden hose:

☐ Yes

☐ No

* Do you have a sump pump on your property?

☐ Yes

☐ No

If so, does it connect to the City Sewer?

☐ Yes

☐ No

* Do you have a swimming pool and/or hot tub?

☐ Yes

☐ No

* Is the above filled by a permanent connection to the water system?

☐ Yes

☐ No

* Is your facility heated by a boiler?

☐ Yes

☐ No

The Illinois Environmental Protection Agency and the Illinois Department of Public Health require hose vacuum breakers to be attached to all outdoor faucets. These devices protect the plumbing system from contamination by any substance that may enter the water hose (lawn fertilizer, herbicides, soap, etc.). Hose vacuum breakers are available at most hardware stores or through your local plumbing contractor.

Please return this completed form by September 30, 2026, to the District Office at: 97 Holiday Dam Road, Edwardsville, IL 62025
